Simply dip your brush in water and make a brushstroke on the paper. The Brushstroke will darken and look and appear just like ink. It's only water and in a few minutes as the water on the Magic Paper dries and evaporates the board becomes clear. The surface can be used over and over again, no mess and nothing to clean. The paper will last for years with proper care. 11 by 13" sumi-e board comes with brush. Also available is a table-top easel to support the sumi-e board (see illustration), \$10.95.
